

### Comments on Competitive Bidding Procedures for Auction 73

- 1) With reference to Para 32 of Public Notice, in addition to upfront payment, are there any other eligibility criterion for the bidder company to participate in bidding process.
- 2) What is the duration of license in 700 MHz band? Also when does the period of license commence i.e. whether it will be from the date the license is issued or from the date the spectrum is allotted after getting it vacated from TV operators? Additionally, what will be the terms of its renewal?
- 3) In the upper 700 MHz (D band) the national level license is for 10 MHz in the form of 2x5 MHz. Is there any restriction on use of this spectrum as paired frequency only or can it be used as two 5 MHz each unpaired blocks?
- 4) We presume that the license spectrum can be used for providing voice and data service also.
- 5) Upper 700 MHz Band C Block is divided into two parts C1 & C2 what is the criteria in defining these two Blocks. Is the C1 Block markets same as of those of A / E Blocks and C2 markets same as C Block. Kindly also clarify the Bidding units/Upfront Payment/Minimum opening bid in these Blocks.
